Boyd Webb (State ITS)	*Ron Jones (Salt Lake City Department of Airports)
Mark Alexander (Logan City)	*Brad Melodic (Cache County Sheriff)
Chad Esplin (Logan PD)	

* Teleconferenced

Conducting: Jake Hunt

I.   Approval of Minutes

The January 2005 minutes were approved without change.

II.   OmniLink

Phil Bates spoke on the OmniLink interoperability project and training needs.

- Main system has been put in, UCAN is mostly on Zone A and they have been bringing rural Utah into Zone B.
- Four other centers are coming on-line: San Juan Co., Grand Co., Logan Dispatch, and Box Elder. That leaves about 4 or 5 left throughout the State. They will try to acquire funding and get that done in the next year. They first have to look at the console equipment to see if it's compatible, or if it needs to be upgraded. Then there's the need for connection to the system.
- Local Homeland Security funds generally drive the console upgrades and State Homeland Security funds do the connectivity.
- Now that centers are on it, they are identifying issues and things they need to do standardized training on. Public Safety has been working on a training video.

III.   700 MHz Plan

- The Region 41 plan has been submitted to the bordering states. We have to receive approval from them before the plan can be submitted to the FCC. Idaho and Arizona have approved it. We are hoping to have the FCC approval by the end of the year or the first of next year.

IV.   Mobile Data

- Homeland Defense funding will be used to finish I-70 coverage.
- CCEP or FEMA funding will be used for additional infrastructure.

- A coverage map will be developed.
- The committee discussed the need to inform UEN of bringing up 700MHz mobile data in the Tooele County region. Boyd Webb pointed out that UEN has been very cooperative in working with us in the deployment of the network in other regions, and that they understand our urgency to deploy in the Tooele region. Boyd will draft a letter informing UEN of our timetable for deployment in the Tooele region.

V.   Vendor Presentation – Motorola Mobile Video Enforcer

Jon Tait gave an impressive demonstration of the capabilities of the Mobile Video Enforcer vehicular digital video camera. For product information, click THIS LINK.

VI.   Next Meeting

September 9, 2005, 10:00 am
UHP Large Conference Room
4501 S. 2700 W.
